PHILIP TRAPP, - Proprietor.

### Here and There

The Open Dominion championship match in the Dominion Marksmen Revolver competition was won recently by the Canadian Pacific Railway Ontario police team with a score of 1425 points out of a possible 1500. R. C. M. P., civic and provincial police also competed.

Plans for the musical festivals of Western Canada during the coming year with a tentative discussion of policies for the next two seasons, were featured at a meeting of delegates of Western Competition Festivals recently at the Palliser Hotel, Calgary.

John Jacob Astor and his bride have decided to extend their honeymoon tour to the Canadian Rockies and British Columbia. "We intend to stop over at Lake Louise," said the young millionaire, "and then move on to Vancouver, taking in the sights on the way."

Captain R. G. Latta, skipper of the liner Empress of Britain and commodore of the Canadian Pacific fleet, retired from active duty recently. He was succeeded on the bridge of the Britain by Captain R. N. Stuart, V.C., D.S.O., U.S.N.C., R.D., R.N.R. Captain Stuart was promoted to the post of commodore of the Canadian Pacific fleet.

Indicating the trend towards greater production and recovery of business, substantial increase in the second quarter of 1934 as compared with the corresponding period of 1933 is shown in the recently published production figures of Consolidated Mining and Smelting, one of world's greatest mining companies.

Driving a highly decorated locomotive into the Canadian Pacific Railway depot at the end of the Calgary-Edmonton run recently, A. N. Hobkirk, veteran engineer, completed 43 years of continuous service with the railway, most of it at the throttle of an engine. "I have always liked my work and I hate to quit," said Mr. Hobkirk.

Founded June 18, 1874, by George and Matthew Beatty and with agencies, warehouses, offices or depots across Canada, New Zealand, the United Kingdom and fifty other countries, the national and world-wide exporting house of Beatty Bros., manufacturers of washing machines and farm implements, celebrated its Diamond Jubilee at Fergus, Ont., last month.

John F. Sweeting, industrial commissioner of the Canadian Pacific Railway, states in an official publication of the railway that there is a decidedly firmer tone of confidence in the West and increased activity in many industries, with the tourist business promising to be better at all resorts this year.

An increase of \$77,000 lbs. in the Nova Scotia lobster catch during the month of May was instrumental in raising the landed values \$233,468 over the same month in 1933, according to an announcement by the Department of Fisheries on June 25th.

## THE NEWS OF STONY PLAIN AND DISTRICT.

Rev Alfred E. Miller, who has been taking a course at the University Summer school, leaves shortly to resume his duties at Sexsmith district.

Dr Brown, dentist, will resume his regular weekly visits to Stony Plain tomorrow, the 10th.

Mr Bjork, of the Sanitary Meat Market, has acquired a Chevrolet coach.

Mr Henry Ries, who has been visiting friends in this district, leaves this week for his home at Beaver Lodge.

A local orchestra has invaded the City—Barth's musician played an engagement at the Tivoli Monday night.

In Edmonton, on Aug 10, to the wife of Rev Unterschnetz, twin girls.

BUTTER AND EGGS WANTED at The Royal Cafe.

### Clark Gabel, Tonight.

Clark Gabel, who was seen on the screen in Kelly's Hall some time ago, will again be in evidence at the same place this Thursday Evg. Aug. 16th. This time Gabel will be seen in his newest picture "Hold Your Man." With him will be seen Jean Harlow, another well known screen artist. Others to be seen in the cast are Stuart Erwin, Dorothy Burgess, and Muriel Kirkland. Patrons may rest assured of seeing a first-class show.

A goodly number witnessed last Thursday's good picture "Made on Broadway." This picture is said to be a characterization of the inimitable Walker, former mayor of New York. The other picture shown "It's News to Me" showed scenes in a daily newspaper office in a big city across the line.

### On Ordering Text Books.

Students in the High School would be well advised in ordering now their requirements in text books for the coming school opening. The experience of the past few years shows that there is a more or less delay in receiving special text books from the Department of Education in cases where students have been remiss in booking their orders until some time after the school sessions have begun. Make up a list of the text books you'll be requiring, and give this to the local agent of the Department of Education.

The official list of Text Books for 1934-5, issued by the Department of Education, can be seen at The Sun Office.

### Blue Ribbon Demonstration.

The demonstration of Blue Ribbon Products given last week at Young's Store was well patronised the afternoons of Thurs., Friday and Sat. Cups of Blue Ribbon tea (or coffee) were served to those who attended, the recipients expressing their appreciation of the service and the excellence of the beverages.

## HARDWICK'S

### Broadcloth Dresses.

2 styles; one made in assorted colors, trimmed with white Organdy on collar and sleeves. The other a pretty figured line in light colors; sizes 36 to 40. 95c.

### Silk Hose.

Sub-Standard full-fashioned Silk Hose, popular assorted shades; sizes 9, 9 1-2, 10; 59c.

### Extra Heavy Broadcloth.

Wabasso Sun and Tub fast; extra heavy weight; a lovely assortment of wanted colors. Sale price per yard 19c.

### Men's Dress Shirts.

Men's Coat style Broadcloth Dress Shirt with collar attached; a good fitting shirt in well assorted shades, each 75c.

### Men's Work Shirts.

English Overt Cloth; Coat style, 2 pockets, buttoned thru; sizes 14 1-2 to 18; shades, green, fawn, blue; \$1.15.

### Men's Work Boots.

Men's Harvest Stitchdown Shoe Special; a real buy in lightweight boot; sizes 6 to 11; \$1.98.

GROCERY SPECIALS—Lots of them.

## USED CARS, SOLD WITH A GUARANTEE.

We have the Car for you—a Car your size, and at your price. Here are real values offered in these automobiles of various makes:

- 1930 Chevrolet Special Sedan; \$475
- 1928 Chevrolet Truck, in good shape, \$225
- 1931 Ford Truck, 157-inch wheel base, one-and-a-half ton; new tires all around, \$500
- 1931 Ford Coach, with good spare, \$350
- All Cars Reconditioned and in Good Shape!

## Sommerfield & Mayer,

Agents for CHEVROLET and OLDSMOBILE CARS. Agents for BRITISH AMERICA OIL CO.

The Only Correct Lubrication—We have the only 9000-lb. Pressure Gun west of Edmonton. Let us grease your car!

SERVICE GARAGE, Stony Plain.

### No New School Readers This Year.

Contrary to the opinion that seems to be generally held, no new school readers will be introduced in grade schools in Alberta this year. The new readers and teachers' manuals will not be put into use in this province until the year 1935, as has been announced by the Dept. of Education. The series will include a set of six readers and a supporting set of teachers' manuals and work books.

Saskatchewan and B.C. are putting all the new books in full use at once.

### Base Ball Tournament at Stony Plain Sunday Next.

## The Checkerboard And Peace

"Britain's frontier is now the Rhine." This statement, made in the British House of Commons by Stanley Baldwin while acting premier during the absence, in Canada, of Ramsay MacDonald, and used to epitomize his plea for extension of Britain's aerial fleets, thrust into vivid prominence the altered status of the mother country in regard to her European neighbors. Development of aircraft by continental powers has banished that security from hostile attack guaranteed heretofore by a powerful navy and the "chalk cliffs of Dover". Automatically, her frontier has been pushed outward step by step with the growth of foreign air armadas and the increasing range of potential enemy aeroplanes.

Synchronizing, as it did, with the disturbing sequence of events which preceded and followed the assassination of Chancellor Dollfus of Austria, the debate in the British house startlingly revealed the extent to which the atmosphere surrounding the European scene had been impregnated with fear of war. No wonder Britain's statesmen are perturbed; no wonder the chancellors have been striving to secure some effective guarantees of territorial integrity among the storm-racked powers of Europe!

The fear of war can be traced directly to the militarization of Germany under Adolf Hitler, and the obvious ambition of the Nazis to extend the sphere of German influence until the Reich becomes dominant in European affairs. Prior to the Austrian embargo, a concerted movement had been launched in Europe whose objective was (and is) effectively to curb Nazi ambitions of territorial expansion, west, east and south. The western frontier, marching with France and Belgium, had, of course, been "guaranteed," by the agreements contained in the Locarno treaty of 1925. Germany, France, Belgium, Great Britain and Italy had agreed, individually and collectively, to guarantee the inviolability of the Franco-German and Belgo-German boundaries as defined by the Treaty of Versailles. There had also to be a complete demilitarization of German territory west of a line drawn east of the Rhine.

Agreements with respect to eastern boundaries, however, were not sanctified by as far-reaching commitments and mutual guarantees. It is true, there was a network of arbitration treaties involving Poland, Czechoslovakia, Germany and also France, but the Reich would not go so far as to accept as inviolate and permanent her eastern border. In fact, the hope has been cherished assiduously in Berlin that sooner or later there would come a revision of the German-Polish boundary which would restore Danzig and the Polish Corridor to the Reich. It is this rift in the lute of peace, diplomats of Europe are now seeking to close by means of what has become known as an "Eastern Locarno".

The "Eastern Locarno" pact now proposed calls for a mutual assistance agreement involving Russia, the Baltic States, Poland, Czechoslovakia and Germany, and would provide mutual guarantees of their respective frontiers and for mutual aid against an aggressor seeking to upset the status quo. As Germany is the only nation fundamentally opposed to the present territorial set-up, the real meaning of the "Eastern Locarno" is apparent.

The actual significance of the proposed treaty is that Nazi Germany's ambitions would indeed be curbed. If Berlin signs (and it has been put squarely up to Hitler), it would mean voluntary acceptance of her present boundaries, all around. It would mean definite renunciation of the Polish corridor and German claims to Upper Silesia. It would mean the stabilization of Europe in its present form. That apparently, is the key move to peace on the European checkerboard.

Apparently, too, "Locarno" is the formula of peace upon which European chancelleries pin their greatest faith. In addition to the "Eastern Locarno", a similar treaty, known as the "Southern Locarno", designed to preserve the Mediterranean status quo and involving, probably, Turkey, Italy, Greece and Yugoslavia, also is mooted.

### Curbing Crime

#### Feminine Crusade Against Crime Started In United States

A feminine crusade against crime—designed to eliminate depredations of the Dillinger type—drew commendation from the United States department of justice.

The crusade has been given tremendous impetus recently by powerful women's organization.

"Women can play a most important part in the curbing of crime," said William Stanley, acting attorney-general.

"They can compare the form of government of their locality with the form in localities where not so many crimes are committed. We plan to set up a central bureau to furnish such information."

"If they find an unusual amount of crime, it is certainly indication that there can be improvement. They can demand improvement."

### Some Odd Professions

#### Many Queer Ways Of Earning Living In India

Apparently, the West has not the sole monopoly of queer ways of earning a living, for the following extract is taken from the current Census Report, an official publication of the government of India, and shows that there are in India such odd professions as those practised by: Sellers of Grasshoppers, Pourers of Water on Gods, Averters of Hallstorms, Buckers of Bad Blood, Settlers of Gold Nails in Teeth, Breakers of Dead Bullock Horns, Cradle Swingers, Professional Identifying Witnesses, Charity Receivers on Burial Grounds, Drivers Away of Epidemics by Charms and Wax Ear Removers. In addition, the Census tables reveal that altogether there are 37,778 people earning their living as horoscope casters, astrologers, wizards, witches, mediums and fortune-tellers.

## Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it seizes you how it may end. It may continue, for a day or two, and you may feel weak and prostrated.

Just as soon as you feel any looseness of the bowels go at once to your drugstore and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this unusual action before the weakening looseness can get started.

Don't experiment. Get "Dr. Fowler's". It has been on the market for 88 years.

### Hotels In Sahara Desert

#### Had To Be Taken By Camels In Small Parcels

As the French penetrate further and further southward into the Sahara, pacifying the roving Arab tribes as they go, hotels are being erected for the accommodation of government officials, visiting army officers, business men and the occasional venturesome tourist.

The hotels had to be taken south, through the desert, in parcels. Each parcel weighed about 200 lbs. and was one camel-load. Caravan after caravan, travelling 45 days through the sands, brought to Timi-moun, in the far south of Algeria, the many tons of windows, doors, glass, china, linen, cutlery, furniture, electrical installation and other equipment needed for the local hotel.

Neither foremen nor European laborers would agree to go there, so the place was built by French army engineers, who themselves had to trace in the sand the first outline of the building because the superstitious wild Arabs of the region feared the Evil Eye, and would not have anything to do with blue-prints. They did consent to make mud bricks, however, which form the walls, and to drag up to the site the date-palm trunks forming the roof beams and "skeleton-work."

The rest had to come in parcels. Even the ships of the desert bringing the parcels were temperamental. They would not travel on even such good hard roads as were to be found along the line of route, but had to be steered over soft sandy courses. Camels suffer from bad spells of foot soreness unless allowed soft tracks.

### Model Hospital System

#### Irish Free State Using Sweepstakes To Further Project

With \$15,000,000 spent and an equal amount awaiting distribution, the Irish Free States hospitals envision an early day when they will be the envy of the world's seagoons and medical research workers.

Ambitious plans for the permanent endowment of the hospitals of the League of Nations health section have been invited so the commission can have the best advice at the laying of the foundations of the project. Twelve sweepstakes have already been held.

The hospitals commission, a body headed by Michael Donan, former chief European engineer for Henry Ford, controls the vast sums which have been painlessly raised in every corner of the globe and prevents haphazard extensions by existing hospitals so as to prevent waste and overlapping. While allowing sufficient cash to trickle out of the fund for current needs the commission is proceeding with its task of evolving a model hospital system for the Free State in which every institution will be co-ordinated with its neighbor.

### Not A Jew

#### Sir John Simon, British Foreign Minister, Denies He Is Of Jewish Origin

Sir John Simon, British foreign minister, denied he is a Jew. Sir John wrote the denial to a correspondent who had drawn his attention to statements current in Britain and abroad that the foreign minister was of Jewish origin.

At the same time Sir John expressed hope his denial would not be distorted to make him appear sympathetic with anti-Semitism, an attitude he regards as "un-English" and which he "utterly condemns". The minister's correspondent had mentioned reports that Sir John's ancestry had powerfully influenced the national government since he became foreign minister.

### Correct Definition

A Sunday school teacher of modernistic tendencies was telling his class that the miracles recorded in the Bible were not to be taken too literally. "My impression is . . .," said he. Then, by way of testing their knowledge of words, he asked, "Can any of you tell me what an impression is?" "Please, sir," said a shrill voice from the corner, "an impression is a dent in a soft spot."

### Canada's Industrial Prairies

#### Report Shows Western Provinces Are Becoming Industrialized

Canada's prairie provinces—Manitoba, Saskatchewan, and Alberta—are rapidly becoming industrialized. While these provinces, often referred to as "The Bread Basket of the World," are famous for their output of agricultural products, at the same time manufacturing plays an important part.

According to a report issued by the Dominion Bureau of Statistics, in 1932 the three prairie provinces manufactured goods with a selling value at the factory of \$187,451,377. Establishments engaged in manufacturing numbered 2,687 and represented a capital investment of \$354,450,263. These plants provided employment for 38,904 workers who received salaries and wages totalling \$42,435,765. The value of materials purchased totalled \$92,247,846 and the value added by manufacturing amounted to \$95,203,531.

Flour and feed mills led all industries with an output valued at \$24,246,761. Slaughtering and meat packing followed with products worth \$23,704,599. Other leading industries were butter and cheese to the value of \$15,754,928, central electric stations \$15,693,275, railway rolling stock, \$12,014,633; petroleum products, \$11,058,020; printing and publishing \$8,787,444; breweries, \$6,359,259; printing and bookbinding, \$4,417,145.

### Soviet Buying Arms

#### Newspaper Claims Shipments From England Going To Russia

A London newspaper says that it is able to reveal that the record exportation of arms from Great Britain, amounting to £2,482,246, was due mainly to orders from Soviet Russia.

The arms consisted largely of machine guns and munitions. More than three-quarters of the total found their way to Russia.

The permission of Whitehall had to be secured for these large shipments.

The reason for these rush orders is that Russia is feverishly buying up the products of the world's armament factories in readiness for the struggle she believes is approaching with Japan.

The armaments business is phenomenally busy.

Although the figures stand so high, they would have been much larger owing to insistent demands from Paraguay and Bolivia, but in these instances applications for licenses by the munitions manufacturers have been turned down by the foreign office.

### Japan Develops New Art

Sculptraphy, by means of which persons or objects may be photographed in solid form, has been developed in Japan. Sculptraphy's greatest contribution to science, according to its sponsors, is in replacing the human element in the making of sculptures where exact likeness is more important than the artistic element. Just as photography replaced painting for such purposes, so sculptraphy has replaced ordinary sculptraphy.

According to the regulations, apples are not considered stemless so long as any portion of the stem is left in the stem end, provided the skin is not broken.

The Great Lakes region is known to weather men as one of the stormiest lands in the world.

### Agricultural Notes

#### Interesting Items Gleaned From Many Sources

There were 36,863 less hogs graded in Canada for the first six months in 1934 than in the corresponding period of 1933.

When salting cucumbers, a layer of dill and a handful of mixed spice may be placed on the bottom and top of the crock.

The cheaper cuts of beef should be used in making soup, both because of their low cost and because they come from those parts of the animal which are richest in extractives.

Bacon exports to the United Kingdom continue to make headway, and the movement to date this year is very far ahead of that for the corresponding period of last year.

On July 14, 1934, 15 geldings, 23 mares, 18 steers, 11 heifers, 6 cows, 6 bulls, 3 stallions, and 1 herder horse, all strays, were in the various official pounds of Alberta.

The British Crown colony of Trinidad and Tobago, with which Canada does an increasing trade, is the largest in area of any of the island colonies in the eastern group of the British West Indies.

A roast will brown more readily if sufficient flour is rubbed into the surface to make it dry. This also assists in preventing the escape of the juices—Beef Bulleit, Dominion Department of Agriculture.

The demand for honey in all the principal countries of the world arises from three main sources: (1) From domestic consumption; (2) from various manufacturing trades, confectioners, bakers, chemists, etc., and from the catering trade.

According to the regulations governing fruit trading in Canada, the phrase "properly packed" means that apples, pears, plums, etc., are not placed in the receptacle or over-preserved, or in a condition which is likely to result in permanent damage during handling or transit.

No fruit of any kind intended for sale shall be packed in any package other than the packages prescribed under the regulations of the Fruit and Honey Act, 1934, for each individual kind of fruit, except that where packages are not identified as for an individual kind of fruit, they may be used for any fruit.

For the month of June exports of cattle to the United Kingdom were approximately 500 head smaller than for June, 1933, the movement being affected by market conditions, but for the first seven months of this year the number of cattle exported to Great Britain exceeded last year's corresponding period by 1,345 head.

When honey from more than one person is included in one shipment under one inspection certificate, the person assuming responsibility for the shipment must place a designating mark, registered with the Dominion Minister of Agriculture, on all lots of honey included in the shipment for the purpose of identifying the packer.

## World Demand For Speed Has Been Met By Fast Air Liners Built In British Factories

World demand for speed has drawn from British aircraft factories, within the past 12 months new types of civil aircraft which, at from 170 to 200 miles an hour, are faster and more efficient than the best comparable machines designed and built abroad.

In recent weeks the world's fastest four-engined airliner, the "Diana," built primarily for work over the extension of the Empire airway from Singapore to Brisbane and New South Wales, has exceeded all expectations in a series of rigorous trial flights. A similar twin-engined machine, the D.H. 89, has proved itself nearly as fast, and just as efficient.

Three more new machines are designed to satisfy the demand for speed are in an advanced stage of construction and will be flying within the next few months. Each is expected to attain a maximum level speed of at least 170 miles an hour; the fastest of the three is designed to fly at nearly 200 miles. This speed will be obtained even in the most powerful of these machines with expenditure of a comparative minimum of power.

Each of the new machines derives power from two engines. Two of them are monoplanes, equipped with the fashionable retractable undercarriage, and the third is a biplane modelled on the mail carrier which was built to air ministry order last year.

Their designed loads in passenger ranges from six, which is the smallest and least powerful of the three, to 10 in the Blackburn craft. Each machine will carry a crew of two.

### Inverts Weather Machine

Denver Man Claims It Will Give Perfect Climate

An Utopian climate is Detroit's for the asking—with warm weather in winter and cool soothing breezes in summer—if the city fathers but have courage to lead the way.

The common claim received a letter from Joseph A. Shires, Denver, Colo., who said he had perfected a "weather machine" and wished Detroit to be the first to use it. He asked that the letter be forwarded to the "Honorable Mayor."

It related a simple inexpensive method of assuring perfect weather at all times, eliminating extreme cold and heat, dust, smoke and unsavory odors of a large metropolis.

These "weather machines" are built by Shires and his associates, he wrote, and may be placed in alleys, houses, vacant lots, or even strung across streets. They were described as being of a long cylindrical shape.

The manner of operation was explained by Shires. He wrote:

"We have our cooling and filtering processes in summer. We pour in the clean cold air which will mix with the hot air rapidly. In winter we propose to take out of the machine the cooling elements and replace them with heating units."

Apparently assuming his invention would meet with some scepticism, Shires said several foreign powers had already sought to investigate it.

### Not Finding Much

But Boys Enjoying Treasure Hunt On Lake Floor

Treasure hunting on the bottom of Nelson lake has not proved remunerative for George Munroe and "Rastus" Woods, two youths of Nelson, B.C., but they are getting a thrill from their "under-sea" exploration journeys.

The youths use a home-made diving gear—a pall with a glass window and an air line made out of a 50-foot section of garden hose. The air is pumped to the diver by means of two small bicycle pumps. A flashlight in an air-tight case supplies the light.

The Nelson divers have descended between 25 and 30 feet, staying down five and 10 minutes each time.

One hammer, a number of cans and a quantity of gravel constitute the "treasure" found.

### Good Food For Sheep

More Home-Grown Grains Should Be Included In Rations

As a class of livestock, sheep are not heavy grain eaters. In Canada sheep are probably fed less grain than in most other countries. This is due to the fact that the majority of farm flocks in Canada are small. During the summer months sheep flocks on the average farm have access to a variety of pastures, hay meadows, and grain stubble fields. During the winter months in some districts they usually have considerable outdoor grazing in addition to hay and straw roughage.

Range flocks are handled under entirely different conditions to farm flocks, but here again the ewe bands are carried through the summer on range pasture and during the winter little or no grain is fed except under most severe weather conditions, and then only for very limited periods. It must be admitted, says A. A. MacMillan, associate chief of the Dominion Livestock Branch, that, if the Canadian sheep industry is to cater more completely to the Canadian market for lamb and mutton meat, a steadily increasing volume of home-grown grains, particularly oats and barley, may profitably be fed to sheep and lambs.

Certain by-products of the Canadian milling industry may also be utilized to advantage particularly in rations for fattening lambs. The waste of bran should be mentioned especially as a protein supplement in the ration for pregnant ewes and ewes after lambing.

### Was Lonelier Than Crusoe

Man Retires After 52 Years Service In Australia

A man on the world's loneliest job has just retired. He is W. Holte, who is going into civilization after 52 years' service on the overhead telegraph line which runs north and south, right through the middle of Australia. His solitude has at times been deeper than that of Robinson Crusoe or a lighthouse keeper. Every inch of the twin wire-linking Adelaide with Darwin, 2,000 miles away, must be supervised constantly to guard against breakages. The line-men are posted in twos or threes at the stations on the line, but when there is trouble to the north and the south at once they are often alone for days. The most desolate postages have their own vegetable gardens and enclosures for cattle, sheep and goats. Travelling over the arid sandy wastes or through thick scrub would be impossible were it not for the camel, and the line-men always employ them when searching for breakages. The normal term in such a post is only three years, but there are men who prefer it to city life, and return for choice to their hermitage where they may enjoy their hobbies in peace.

Mr. Currie had no time to talk. She was busy working. And she proved to the world that actions speak louder than words.

Price of pattern 20 cents in stamps or coin (coin preferred). Wrap coin carefully.

By Ruth Rogers

NICE AND PLAIN AND SMART—  
ISN'T IT? IT HAS SLENDER  
CAPE AND WRAP-OVER  
TREATMENT

The cape is versatile. It's almost magic. It seems to turn into sleeves at the front, while you look at it. The wrap-over arrangement is always a favorite with the larger woman. It silms the figure so perfectly. The skirt allows plenty of freedom for walking.

Maize eyellet battie, so refreshingly cool to look at and to wear, made the original model, as sketched. You can copy it exactly at very little expense. It's simple as falling off a log to make it.

Chiffon cotton voile prints, linen prints, tub pastel silks, pique voile print, etc. are other lovely materials for your choice.

Style No. 381 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3 1/2 yards of 36-inch material.

Price of pattern 20 cents in stamps or coin (coin preferred). Wrap coin carefully.

## Rapid Growth Of Crops Secured By Use Of Chemicals And Other Artificial Aids

### Salt In Hay Now

Retards Generation Of Heat And Also Prevents Mould

Spontaneous combustion may take place in hay that is apparently well cured and uniformly dry when stacked or stored in the barn. A state of uneven moisture throughout the stack, developed after storing, is sometimes sufficient to cause spontaneous combustion. The heavier hays, such as alfalfa and clover, are more liable to spontaneous heating and combustion, since their stems contain a greater per centage of moisture and they are difficult to cure properly.

Salt on hay in stacks or mows retards the generation of heat, keeps down the growth of molds which cause mustiness, streaks and loss of food value, and makes hay more palatable and healthful to animals. Salted hay has a better color and aroma and a higher per centage of attached leaves, due to being cut green and stored early.

All farm animals need salt and thrive on a properly salted diet. It has been proved that cows must have salt to give milk and raise calves. Salted hay has been observed to produce more milk from cows. Feeding experiments show that as much as 20 pounds of salt added to a ton of hay has no harmful effects on animals; 30 pounds per ton has a slight purgative action.

When salting hay, use an adequate amount—10 to 20 pounds to the ton of hay and distribute evenly throughout the load. Place hay in the stack or mow in layers of 12 to 15 inches thick and apply salt liberally after each leveling with the hayfork or slings.

### The River Postman

Ingenuous Way Of Despatching Mail During Siege Of Paris

During the siege of Paris by the Germans in 1870 the post office administration hit upon the expedient in addition to the balloons, of enclosing letters in small zinc globes, water tight and hermetically sealed, and dropping them into the Seine. There they floated, if they were not captured by the Germans, down the river to the French lines, where a net stretched across the river gathered them in, and they were sent on their way. Unfortunately, for the French, the Germans discovered the character of these zinc floats, and as they could not hope to see and fish out by ordinary means all the letters that went down there, they stretched across the river, at Villeneuve Saint Georges, a net of their own and effectually stopped this system of postal communication. The zinc balls and their use were pretty nearly forgotten, when about 20 years ago, a fisherman found in the Seine, near Villeneuve, a queer looking globe of zinc. With a large knife he opened it, and found three hundred letters, still legible, and all dated December, 1870. They were delivered to the postal authorities and were forwarded to their destinations after having been in the river for more than 30 years.

Electricity is another force which is being turned to account in the hastening of nature's process. Experiments have shown that a field treated with an electrical "discharge" will increase grain crops by nearly 50 per cent, root crops, like potatoes and turnips, are doubled when delicacies of the strawberry and green pea like show 25 per cent, or more increase.

It is not a pleasant picture which the possibilities of all this progress calls up but the change is as certain as the change which followed the invention of the steam engine. Twenty years from now the minutes of last year's world economic conference, with its resolution on wheat acreage reduction, will make amusing reading.

However distasteful the vision of coming events may be there can be no denying the fact that agriculture will eventually need the scientist and all his resources. World population is increasing rapidly and the productivity of the earth, with our present methods only, is strictly limited.

A Mathematical Expert

Three-Ton Machine Does Work In Record Time

A machine which, when completed, will weigh more than three tons and will think faster than the human brain, is being built at the University of Pennsylvania, Philadelphia.

It is called a differential analyzer and is the second of its kind in the world. It will be bigger than its predecessor, having a length of 26 feet and a width of 10 feet.

In 15 minutes it can do work which would take a dozen expert mathematicians a week to complete. While the machine can be used in all branches of engineering, it will especially aid in calculating firing ranges by the army and navy.

Canada's Leather In Demand

Canada is now producing some of the finest leather in the world and is competing successfully abroad, according to the industrial department of the Canadian National Railways. In past leather, the Canadian product is especially desired.

DISTINGUISHED "FIGHTING MEN" ARRIVE FOR CANADIAN CORPS REUNION  
Viscount Allenby, conqueror of Palestine, and Admiral Reginald Tyrwhitt, hero of the Dogger Bank and Heligoland Bight, are shown as they reached Canada on board the Empress of Britain. Reading from left to right, are: Sir Reginald Tyrwhitt, Lady Tyrwhitt, Lady Allenby, and Viscount Allenby.

## WORLD HAPPENINGS BRIEFLY TOLD

Fifty families at Deptford, England, were rendered homeless by the collapse of houses following subsidence of a road after heavy rains.

The Soviet Union's wheat harvest covered a total surface of 87,500,000 acres this year, which was 32,000,000 acres more than last year, it was reported by the Tass News Agency.

The British Exchequer will benefit by approximately \$5,900,000 in death duties from the estate of the late Viscount Tredgar, landowner, who left an estate valued at \$11,845,000.

Fire destroyed Hillsborough Castle, seat of the governor of Northern Ireland, the Duke of Abercorn. It was one of Ulster's most historic spots.

United States exports to Canada in June, according to department of commerce figures, showed a sizeable gain over June, 1933. Imports from Canada registered a moderate gain.

Receipt of a cheque for \$1,000,000 as a gift from the Rockefeller Foundation was announced by McGill University. It represents the endowment by the foundation of the department of neurology.

Dr. Albert W. Abbott, administrative head of the Canadian Red Cross and in wartime Ontario director of labor for the Imperial Munitions Board, died Aug. 7 at his home in Toronto.

France denied Japan her support in any steps toward abrogation of the Washington naval treaty of 1921 by announcing her intention to adhere to its provisions pending "some change in the European situation."

Concentric radio stations for noting positions of aeroplanes and indicating their exact position if necessary will be set up around the coast of the United Kingdom, the air ministry announced.

Off the west coast of Belcher Island, tribute was paid to Henry Hudson and his son who three centuries ago were put adrift by a mutinous crew and never seen again. On the boat deck of the ship the ceremony was carried out by P. S. Ashley-Cooper, governor of the Hudson's Bay Company.

## Little Journeys In Science

### SOLUTIONS

(By Gordon H. Guest, M.A.)

When a spoonful of salt is placed in a glass of water we observe that the salt disappears. The scientist describes this simple fact by saying that the salt has dissolved in the water, and he calls the resulting mixture a salt solution. The substance which is dissolved is called the solute, and the material which does the dissolving is known as the solvent. Thus, when salt is dissolved in water, the salt is the solute and the water is the solvent.

Water is the most common and useful of all solvents. It dissolves many solids such as sugar, salt, washing soda, and saltpetre. It also dissolves some liquids such as alcohol, which mixes readily with water in any proportion. Some gases are very soluble in water, whereas others are only slightly soluble. Ammonia gas dissolves very readily in water, producing a solution which is sold as household ammonia. Oxygen is an example of a gas which is only slightly soluble, being found to the extent of three parts by volume to 100 parts of water. However, this small amount of dissolved oxygen is sufficient to keep fish alive. The fish extract the oxygen from the water by means of their gills.

We are quite familiar with many other solvents. Gasoline is a good solvent for grease. Turpentine dissolves paint and other dissolves fats. Another good solvent for grease is a liquid known by the chemical name carbon tetrachloride. This is sold widely as a cleanser, under various trade names.

Plants can only use the minerals from the soil in solution. The water in the soil dissolves some of the minerals, and this solution is taken in through the roots of the plants, and up to the leaves by capillary action. In the human body all food is dissolved or "digested" into soluble substances before being taken into the blood stream.

"Hardness" in water is due to the presence of certain minerals which are dissolved in the water. The hard water frequently found on the inside of tea kettles is made up of these minerals, which are left behind when the water changes to steam.

## Thrills Of An Under-Privileged Sportsman's Life

By JACK MINER

Yes, readers and they grow to be more thrilling as the years ripen the human mind to be more and more appreciative and considerate of the blessed food and soul building and powerful advantages God has given us in the study of His great outdoors. Personally, I am compelled to believe that my handicaps have brought me favours that money cannot buy nor take away. For illustration, as soon as I was big enough to toddle after father on a pigeon hunt and pull the top rail off a high fence down on me I can remember father shouting in his English accent, "Ere they come Jack, 'urry up and 'ide." And soon I got the thrill of hearing the thunder of that old black powder and see the pigeons rain down all around and about me. Later on come the thrill of moving to the much talked of Canada and locating and catching my first den of sweet, pretty, little, hard-biting red foxes. Then when fall came on and we were all meat hungry, I slipped out, and one snowy Sunday morning had the thrill of my life, for in less than an hour I had killed my first deer. I

Jack Miner about to liberate a tagged Canada Goose to study its route of migration

was then only 13 years of age, and could neither carry or drag it. So I ran home for help.

Sportsmen remember this, youth is the springtime of life, and age is the harvest, and at the price the average sportsman is paying for his sporting thrills to-day I have long since been a multi-millionaire.

Years and years before we had an open season on moose in Ontario, I hunted them in Quebec, and time and again I have enjoyed the tingling thrill of having a small car load of moose at the mercy of my rifle, and from 1903 to 1917 they were nearly as thick in Ontario. (Moose I believe are the largest antlered game on earth.)

I have flashed a light into a bear's den and been thrilled by seeing three of these big fellows with pretty faces, looking helplessly and pitifully at me.

I have answered the howling of a wolf and as proof that I fooled him I soon saw him come quivering towards me, and without exception I had the sporting thrill of all my shooting career as I pressed the trig-

ger and saw this modest timber wolf leap high in the air as that high-power bullet crashed through his living room.

But remember the above are all dead thrills, and a certain per centage of them to me have long since become petrified regrets, and the last thrill they produced for me was when I sold and loaded my whole mounted collection into a box car to go to the Panama Exhibition.

And so the last quarter of a century I have contracted more to living thrills. One pair of horn swallows protected from their imported enemy (the English sparrow) multiplied to 25 nests, which produced two hundred or more young thrills by the fifth year.

Three wild ducks left alive brought seven hundred ducking banding thrills in seven years.

Four years of careful study and anxious waiting was rewarded by hooking thrills when eleven high migrating Canada hawks shut off the gas and put on the four wheel brakes, and thrilled the whole neighbourhood with wonder and excitement, as they lowered steadily and

continuously down, down, down, down, until they joined and rejoined with the winged tippled decoys in the mud hole below.

But possibly the most blessed and far reaching living sporting thrill that ever thrilled any sportsman's career came to me one night while at my work (burning brick). Yes, it was about 2:30 a.m., and I was sitting back from the kiln waiting the time to build the next fire. Yes, I am lying studying the stars that guided me in my boyhood raccoon hunting days. Yes, that have guided me hundreds of miles through the pathless wilderness. Yet I couldn't call them by name. But here they are all back in my November formation, and in my simple way I seem to want to know more about them. With my hands I try to focus my eyes on them and so forth. Just at that stage of my anxiety my very soul was thrilled to the extreme limit with what I firmly and conscientiously believe was the still small voice saying, "Stamp your Sunday text and those Salvation Army calendar messages on your goose bands, and

make missionaries of your hand-birds. Reader, in a flash I threw that old blanket off my shoulders and sprang to my feet as quick or quicker than I have ever seen a bull moose circle out of his bed. Yes, how to do it and its far reaching possibilities all seemed to be visualized or picked up in the same flash.

Well, since then I have caught, banded and liberated over 10,000 Canada geese. Think of it, 10,000, ten pounds of honking thrills tossed into the air to go and multiply. Oh picture now if you can an aged white haired man, reaping living thrills from his life-long study. He has fairly good hearing he knows. He knows by the language and accent the geese are using, that they are feeding on the shelled corn that is in the foot of water under the net. And clad in warm clothes and hip rubber boots he slips quietly over the pine needle carpet under the trees planted by his own hand. Soon he is in Job's Library with the trip wire in his hand ready for action. The thrilling sight of seeing between two and four hundred geese under the net

Jack Miner about to liberate a tagged Canada Goose to study its route of migration

gives him such tingling thrills that his strong well preserved hand quivers more than it did when he shot his first deer. Soon a low quiet, built up to a shrill whistle from his lips causes every goose to raise his head. That instant the trembling jerks the trip wire, and gas pipe frame and trap doors come down with a splash, and three hundred and eighty-four missionaries are in captivity and not one hurt. Yes, it was great, a living thrill such as lives on and multiplies into thrilling thrills.

As proof of this I now quote the following letter which I received last week, and in a separate box came 54 goose bands. These bands were put on during the following years: 1 in 1926, 5 in 1926, 6 in 1926, 7 in 1930, 17 in 1931, 14 in 1932, 1 in 1933.

Anglican Mission (B.C.M.S.) Fort St. John, c/o Hudson Bay Co. 100 McGill St., Montreal, Canada, July 8th, 1933.

Dear Mr. Miner, Thank you for your letter of October 14th, 1931. I would have replied before but I have been trying to collect a good many tags from the Eskimos.

I have collected a number, and gladly forward them to you. The Eskimos are still in possession of a good many old ones, and they do not care to give them up. However, if you could kindly send me a good number of Bible Lesson Picture Tracts, to go inside their Bibles, I am confident that I could obtain all the tags they possess. Perhaps you could see your way clear to send me about 1,000 of the above tracts; I do not know what these may cost; but do not go to too great an expense.

The geese that have gone by this way the past few years have not had such a great number of tags attached to their legs.

I am only too willing to assist you in your work, so please ask me any details you desire to know about.

With all kinds thoughts, Yours very sincerely, Signed, Arnold G. Herbert.

Now please don't condemn the Eskimos for wanting to study the colored pictures mentioned in Rev. Herbert's letter, but first condemn me. For a time during my Sunday school career I strolled into Mrs. Miner, where she taught the infant class, and shared with them at least one look at the day's lesson. Possibly you see the colored pictures of the little curly-haired Carpenter standing before and holding the intense attention of a delegation of men. Or it may be that of Joseph making himself known to his aged broken hearted father. I tell you about all this and always kindled my inspiration to be more considerate, patient and loving, when I went and sat down with my own class of mischievous teen aged boys.

For a time during my Sunday school career I strolled into Mrs. Miner, where she taught the infant class, and shared with them at least one look at the day's lesson. Possibly you see the colored pictures of the little curly-haired Carpenter standing before and holding the intense attention of a delegation of men. Or it may be that of Joseph making himself known to his aged broken hearted father. I tell you about all this and always kindled my inspiration to be more considerate, patient and loving, when I went and sat down with my own class of mischievous teen aged boys.

Now please don't condemn the Eskimos for wanting to study the colored pictures mentioned in Rev. Herbert's letter, but first condemn me. For a time during my Sunday school career I strolled into Mrs. Miner, where she taught the infant class, and shared with them at least one look at the day's lesson. ## Keep To

## NEW MEASURES TAKEN AGAINST AUSTRIAN NAZIS

Vienna. — Chancellor Kurt Schuschnigg announced the government's agreement to Vice-Chancellor Franz von Papen of Germany as special envoy to Vienna, at the same time taking powerful new measures to end Nazi propaganda in Austria.

A government communique announcing Von Papen's acceptance revealed at the same time the granting of sweeping powers to Major Emil Fey, minister of the interior. In his capacity of special commissioner for security measures, Fey is charged with snuffing out Nazi influence.

The long-delayed acceptance of Von Papen by the Austrian government as Chancellor Hitler's special appointee came during a cabinet meeting.

The new envoy faces a difficult task in improving relations which have been strained since Hitler came to power and embittered after July 27 by what the Austrian government openly considered to be proof of a putsch partially planned in Germany. Although it was understood, no conditions were attached to the acceptance, it was generally believed here the length of his residence as special envoy will depend more upon the future actions of the German government than upon anything Von Papen can do in Austria.

Under the new German law, Fey can order dismissal of private employees held to be guilty of spreading Nazi propaganda against the government. "Patriotic" persons will be given jobs thus vacated. The new government thus will go a step further than the Dollfuss regime over-ventured in efforts to wipe out Nazi influence.

The relentless campaign of the Austrian government against the Nazis claimed another life on the gallows—this time the life of a soldier in the regular army.

Ernst Felke, a soldier, was hanged in the courtyard here for participating in the putsch in which Chancellor Dollfuss was slain.

He was the first member of the government armed forces to be tried and executed on charges of high treason in connection with the Nazi outbreak.

Another death sentence was imposed today in Klagenfurt, but the prisoner, Karl Kosterling, also a Nazi, received a commutation to 15 years imprisonment from President Miklas.

Felke in his court martial trial brought in the name of Emil Fey, former vice-chancellor and still a cabinet member, who was imprisoned in the federal chancellery when Dollfuss was killed.

Felke testified that the Nazis who seized the government building desired to establish a "ministry of national concentration" with Anton Rintelen, then minister to Rome, at the head and with Fey as a member.

The defence in the trial sought a hearing by the new chancellor, Kurt Schuschnigg, as to whether safe conduct to Germany had been promised to the putschists. This the court rejected.

As the death sentence was imposed, the soldier raised his arm in a Nazi salute and shouted "Heil Hitler!"

He was pulled back by his bench by a guard.

### Grant Wage Increase

Montreal. — An agreement giving wage increases of 10 per cent to those paid by the week and 20 per cent to piece workers virtually brought to an end a strike that tied up the women's clothing industry in Montreal for more than a week. Some 2,000 workers, members of the International Ladies' Garment Workers' Union, will return to their benches.

### Tree Museum

Seattle. — Work has been started on what officials say will be the "biggest tree museum in the United States." The Washington Emergency Relief administration made \$300,000 available for the giant Lake Washington arboretum.

## Churchill Busy Port

Takes On Business Aspect At The Opening Of Navigation

Churchill, Man.—Rising from the rock-ribbed Hudson Bay shore, the mammoth elevator and docks of Canada's most northern seaport have taken on a business like aspect as preparations went ahead for opening of navigation within the next few days.

Three steamers are inward bound, the S.S. Dalworth of the Dalgleish lines, the S.S. Brandon, and the S.S. Rio Clara. No longer a mere outpost of civilization, but a vital point in the commerce of a vast north, Churchill girded itself for the busiest shipping season since the northern water route was opened in 1931.

Ten ships have been chartered to handle Churchill's share of that golden tide of grain which flows each fall from Canada's western prairies. The 2,500,000 bushel elevator is filled to capacity and in addition to grain cargoes, cattle, fowl, oatmeal and other commodities will be shipped from the northern port this year.

The S.S. Brandon last year made two trips to Churchill and took the first cattle shipment of 20 head over the northern route. The Brandon will again depart with a livestock cargo and it is believed this boat and the S.S. Grebfeld will both make two trips to Hudson Bay this year.

## Leaves To Claim Fortune

Former Alberta Man Will Use It To Establish Innocence

Toronto.—John F. Gallagher, convicted in 1922 of the murder of John G. Coward in Alberta, sentenced to be hanged and later acquitted, has left for England to claim \$500,000 which an aunt promised him if he settles down and marries before Dec. 25, 1935.

Gallagher, who has been living in Toronto during the last three months under an assumed name, was convicted of an arson when his home in Alberta was destroyed by fire. Sentenced to life imprisonment, he appealed and his sentence was judged excessive. It was reduced to 10 years and he served the term in full.

Gallagher plans to use a portion of the fortune he will receive in England in an effort to establish his innocence of the arson charge and bring to justice the murderers of Coward and I. Fuller, friends and neighbors in Carbon, Alberta, both of whom were killed within a year.

## Strengthen Gold Reserve

Flow Of Hoarded Gold To London From India Now \$750,000,000

New York.—The flow of hoarded gold from India to London, which began with Britain's suspension of the gold standard not quite three years ago, has now exceeded the sum of \$750,000,000.

This movement of metal from the hide-aways of the east is a major factor in strengthening the financial basis for economic recovery, in the opinion of many commentators. Much of the gold has gone into the vaults of central banks where it provides the foundation for credit and currency.

## To Reduce Relief Burden

Dominion To Put 1,200 Men To Work On Jasper Highway

Calgary.—The Calgary Herald published the following:

"For the purpose of reducing the relief burden of Calgary and Edmonton, the Dominion government plans to take 1,200 married unemployed men who are receiving relief and put them to work on the Lake Louise-Jasper highway at a wage rate of 40 to 45 cents an hour.

"Six hundred men will be recruited from Calgary and 600 from Edmonton," it was said.

### Gold In Manchukuo

Tokyo.—Geologists and mining experts believe Manchukuo has rich deposits of gold, hidden in its extensive Kiangnan and other mountain ranges and river valleys, only awaiting exploitation by modern methods to yield returns that would make the new east Asian empire one of the wealthiest countries in the world.

## DEPOSED "PRESIDENT"

According to Germany's constitution, Dr. Erwin Bumpke, President of the German Supreme Court, should have succeeded the late President Paul von Hindenburg. His term of President would last only until a successor could be elected, but Hitler elected himself before Bumpke had a chance at the post.

## Elected By Acclamation

Hon. Peter Heenan Wins Uncontested Seat For Ontario Legislature. Kenora, Ont.—Hon. Peter Heenan, appointed to the Ontario cabinet by Premier Mitchell F. Hepburn as minister of lands and forests, was elected by acclamation to the Ontario legislature in the Kenora-Rainy River by-election.

Resigning his seat in the federal house, Mr. Heenan was nominated by the Liberals for the Kenora-Rainy River seat when Earl Hutchinson, Liberal, resigned to pave the way for Mr. Heenan's entry to the Ontario cabinet. When the time limit for nominations passed, Mr. Heenan's name was the only one submitted and he was declared elected by the returning officer.

## Pension For Dollfuss' Widow

Will Receive Sum Equal To Chancellor's Salary

Vienna.—The semi-official Wiener Zeitung published a decree by which Austria accorded the widow of Dollfuss a pension for herself and her children.

The widow will receive during the term of her widowhood a yearly amount equal to the late chancellor's salary. In addition she will receive a special sum for each of her children. In the event of her re-marriage the children will continue to receive special pensions until they come of age.

### Old Shell Kills Boys

Kowl, Poland.—Five little boys were torn to pieces by the explosion of a world war shell they attempted to take apart. Two other lads were badly injured. The boys were tending sheep at the time.

## THEY WAITED—BUT HE NEVER CAME

While the Austrian chancellor in Vienna was being raided and Nazis snuffed his life, the wife and children of Chancellor Engelbert Dollfuss awaited his arrival at Nicosia, Italy, where the Dollfuss family planned to take apart. Two other lads were badly injured. The boys were tending sheep at the time.

## Marketing Plan

Plan To Be Put In Operation, Beginning With Apples

Toronto.—The Globe in a special despatch from its Ottawa correspondent says the Dominion government's experiment in control and regulation of marketing of natural products will be inaugurated this week. The first products to be dealt with under the scheme will be apples and pears, the Globe says.

The first step in launching the scheme will be the designation of a minister to take charge and it is expected Hon. Robert Weir, minister of agriculture, will start the task at once. The cabinet will then pass approval on Mr. Weir's selections for the federal marketing board after which the act will be promulgated.

The Globe added:

"Mr. Weir, it is understood, will take personal and active charge of the operations of the federal board, whose primary function will be to deal with the various schemes submitted by producers throughout the Dominion. The federal organization is expected to include in its various departments such officials as D. Horace Barton, deputy minister; Dr. J. F. Booth, formerly director of markets for Saskatchewan; and an authority in the department of the wheat situation; R. L. Wheeler, acting fruit commissioner in the absence of G. E. McIntosh, who is ill; J. F. Singleton, dairy commissioner, and G. B. Rothwell, livestock commissioner.

## Reformed Calendar

Windsor Man Proposes System With Five Weeks In Each Month

Windsor, Ont.—A 12-month year with five weeks in each month and six days in each week is the simplified calendar which Alexander J. Gilmore, of Detroit, has before the world to-day. He would eliminate Saturday.

His plan would make a working year of 360 days, during which time the calendar would be unchanged from month to month, Sundays would always come on the seventh, 13th, 19th and 25th each month. There would be no Friday, 13th.

To take up the remaining five days, Mr. Gilmore would have them follow Christmas, being a series of festival days. They would end with New Year's day.

## May Stop Wheat Exports

U.S. Needs Pacific Northwest Supply For Domestic Use

Washington.—The farm administration plans to stop exporting wheat from the Pacific northwest because of the rapidly diminishing supply in the United States.

To date 28,000,000 bushels have been sold abroad by the North Pacific Emergency Export Association. Their operations soon will be stopped and remaining and prospective stocks shunted into domestic channels.

## PROJECT TO BUILD UP STRONG AIR FORCE IN BRITAIN

London.—Goniometric radio stations for noting positions of aeroplanes and indicating their exact position if necessary will be set up around the coast of the United Kingdom, the air ministry has announced.

The project is part of the new force to build up the Royal Air Force to protect Britain in case of invasion.

Such stations are slated for the Isle of Wight, Ireland, Scotland and the north of England.

"A confidential mission of the highest importance connected with the defence of the Empire" is being undertaken by Sir Maurice Hankey, secretary of the imperial defence committee and of the cabinet, according to the Daily Herald.

It was announced Sir Maurice is leaving for Australia to attend the Victoria centenary celebrations and on the way will spend some time in Cape Town, South Africa, Lady Hankey's former home.

Describing the centenary celebration as the ostensible purpose of the visit, the Herald says the utmost secrecy is being observed with regard to the real object. It says that in addition to South Africa and Australia Sir Maurice will visit New Zealand and Canada to discuss with experts on the spot vital matters of military, naval and aerial strategy.

The paper further suggests these questions are connected with "defence problems arising out of the new turn of British policy resulting from the recent vital matters of the French general staff and Lord Halifax (British minister of war) also the naval requirements of the Empire in view of the outlook for the 1935 naval conference which the Herald describes as 'blooming' over."

Sir Maurice's intention to visit Canada and New Zealand is also mentioned by the Daily Mail and the Daily Express. The Mail says he will take advantage of his trip to make a tour visiting the various Empire governments on behalf of the cabinet and adds it is understood important questions of imperial policy, particularly with regard to defence, will likely be discussed.

It was stated some time ago that Sir Maurice would advise Australia on defence matters during his visit.

## Studying Crop Loan Plan

Would Give U.S. Farmers Control Of 1935 Supplies

Washington.—A gigantic crop loan plan which would leave control of 1935 supplies in the hands of farmers who grow them is hatching in the United States farm administration.

Modeled after this year's corn and cotton loans, the plan will call for government loans on a wide range of other crops. There will be a stipulation that supplies must be sold when prices rise to a certain point.

Last year the government advanced farmers 10 cents a pound on stored cotton, and 45 cents a bushel on corn sealed in cribs or warehouses. This pegged prices at those levels and officials say the plan was a success.

As prices advanced beyond those levels recently, farmers began selling crops, paying off loans and making a profit for themselves.

### Start Dionne Home

Callander, Ont.—Excavation work has started for the new home of the 71-day-old Dionne quintuplets. The modern brick building will be known as "The Daffoe hospital for the Dionne quintuplets" in honor of the celebrated north country practitioner who has amazed the world with the favorable progress his direction has brought the infants.

### Hoover Re-Union

Cuyaga, Ont.—More than 500 persons spent the day of the Hoover family at Hoover's Point, Lake Erie. They came from Kitchener, Buffalo, Marham and many places in Haldimand county. A huge dinner and sports program marked the gathering.

## \$100,000 TO BE SPENT ON JASPER HIGHWAY.

As a result of the visit to Ottawa of the Hon. George Hoadley, who was there on matters in connection with the Alberta Government, including unemployment relief, it is expected a sum computed to be not less than \$100,000 will be available for the unemployment relief, and that a considerable portion of this will be available for the work of completing the Jasper Highway project. \$200,000 was the amount included in the list of relief works projects submitted by the Alberta Gov't to the Federal Administration.

### Hansen Corners.

All the road work hereabouts is practically completed now.

Mr J A Young has been the first one to cut wheat here, and it is said to be a good sample.

It seems like old times, with so much rain. But the crops here are the best in twenty years.

Mr B E McLennan, an old resident of Hansen's Corners, has been renewing old acquaintances here. "Bert" has spent the past three years at Tucson, Arizona, and Tyler, Texas.

Miss M J Young expects to be leaving in a short time on a trip to B.C.

Mr Dougall McDonald last week shipped 14 hogs to the packing plant, of which 11 were selects and 3 bacons.

Mr O Wilkins is leaving shortly on a trip to Banff Hot Springs.

"Big Dan" predicts that threshing operations are liable to break out, any minute.

## Stony Plain and District

Miss Clara Hennig, who had been visiting friends in this district and Edmonton, has returned to her home at Hualien.

Mrs S Weinberg, Edmonton, is spending a short vacation in Stony with her mother Mrs Comisarow.

The Vacationists are returning—Ed Danbauer has moved in from his cottage at South Edmonton Beach.

H C Oatway and O Wudel are, this week, at Pigeon Lake resort, having gone down the Croftie trail.

Mr and Mrs L M Larson, and Mr and Mrs H B Bjork were guests at the Darmstadt wedding dance at the Tivoli, Monday night.

Mr M Schellenberger on Monday brought to The Sun office a wheat stalk, grown on his farm, which has a character similar to a capital "B" traced on it. He says his oat and barley fields have stalks bearing this mark.

Mr Syball had recovered sufficiently from his accident, when his car turned turtle on the Highway—to take it out again, and says the old bus now makes 20 m.p.h. without the top and windshield.

The Glory Hills silver cornet band paid Stony a visit Saturday Evg., and played a number of selections in front of the P.O.

The attention of readers is drawn to the advt. of Pioneer Service Station, where Proprietor John H Miller is offering a special for the next 2 weeks. This station may have a surprise for you on Saturday next.

Mr Miller's new service station is nearing completion and presents quite an imposing appearance on South Main street.

Adam Mohr has the contract for building an addition to Kelly's Hall, work on which will shortly commence.

Mr Ted Winice intends going into the trucking business and is negotiating the purchase of a three-tonner.

Mr M Schellenberger has just finished drilling a 63 foot well at Holborn Schoolhouse.

Stony Plain.

## Spruce Grove News.

Miss Frieda Gabel was hostess to a number of her young friends, at the home of her parents, Sunday Evg.

Peace Church Missionfest on Sunday last was well attended, and close attention was given the addresses delivered by the visiting clergymen. Rev H Kuring, the pastor, was in charge.

Mr H Brox intends motoring down to Lacombe this week.

There is said to be some dissatisfaction among ratepayers in the newly-organized Rural High S. D. regarding results obtained by pupils at the June Departmental examinations.

On Sunday next, the 19th, a Confirmation service will be held at Peace Lutheran church Spruce Grove, when the following will be examined, confirmed and take their first Communion: Emil Javorsky, Clarence Lienan, Geo Pootz, Walter Pootz, Hy Schmidt, Adela Diesterheft. Rev. H. Kuring, pastor.

Herman Loeblich has been doing some good work on his Edmonton ball team, South Side Athletics. Of his Sunday game the Bulletin says: "Herman was steady after getting off to a shaky start in the 1st inning and allowed only 6 hits after giving up 4 in the opening frame. It was his 3d game in 4 days, and he turned in a highly-creditable display."

His friends here will regret to learn that Harvey Morrow, a former resident of the Grove, lost his new truck by fire, when it got overheated.

During the month of August Spruce Grove congregation will worship with Stony Plain every Sunday morning at 10 o'clock. There will be no service at Spruce Grove during August.

## SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and tells her to go. Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis "Inspiration." Peter adopts the latter title and Camilla, heartily, goes to the studio to see it and to think. Peter and Avis follow later, and as the lights are turned on, the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster and hurt and horrified by the accusation, dies.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

Camilla's advertising campaign and tiny tots broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was so ably stimulating business for his company.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France.

(Now Go On With The Story)

## CHAPTER XVI

"I want you to be the very last person I see when the train leaves," Peter had told Camilla, when they planned for their last day together. They had dined at the Chateau Cottage, their happiness tempered with the ache of memories and the apprehension of the future. But, for Peter's sake, Camilla staunchly thrust aside her fears for what lay ahead and committed herself obediently to this exquisite joy of the moment. She scarcely took her eyes from Peter's sunny face, storing up in her mind a living picture of it to take out and look at often in the lonely years ahead.

They talked of trivial things, jested gayly, as if a threnody of sadness did not accompany their thoughts. They lingered over their macaroni and meat tase, as if it were not five short years before they would part for one long year.

They walked slowly in the crisp

**LYDIA E. PINKHAM'S VEGETABLE COMPOUND**

W. N. U. 2059

chill of the late autumn evening to Peter's dismantled studio in the Anson Building, as they had done on their wedding day four months before. It was then that Peter dropped his mask of cheerfulness and anxiously, holding her in his arm, with his face pressed to hers:

"I wish you might have gone to New York with me, at least, to see me."

"Two days more isn't so much out of a whole year," she consoled him. "And I think it might be even more difficult for both of us. I see you leave on the train. I try to make myself believe that you're not going far and won't be gone for long. But to watch a boat carry you down, down the river and over the horizon—" she sighed.

He crushed her close and her hand went up to caress his face. "If only you might go with me!"

"Which is impossible," she added, with a dull finality which left them both silent for awhile.

His trunk had gone, his Gladstone bag stood in readiness beside the door, like an object of evil taunting and challenging them from the shadow beyond the arc of light from the closed lamp.

And then, with a sudden speeding up of time, they were at the station in the midst of the clamor of roars, shrieks, bells, voices, laughter. They were no longer Camilla and Peter Anson, wife and husband, but they were separate entities, soon to go their separate ways, and confused for a few brief moments with the conflicting forces of humanity.

Camilla watched the gate man punch Peter's strip of ticket and tear it in half with the casual indifference of a doorman at the theatre tearing off the ticket stubs which gave you the privilege of being amused for a few hours. What a different significance the return of the half ticket had! It gave Peter the right to go to the other side of the world and stay away from her for a year.

She went with him into the Pullman car, found his berth—upper berth. "That's a lucky number to be sure," she said, with a smile. "But I shan't always take the way of least expense, you bet. Some day, you and I will have a drawing room when we travel."

"Or could we," she suggested, "be married?"

"And you will try to come over in the spring?"

They had talked that over many times, but they foundered for things to say that would fortify their cheerfulness.

"Before we know it, your work will be going splendidly and we shall be writing about where and when you will meet me," she promised again.

The clamor outside increased, late arrivals followed hurrying porters into the car with their luggage. Peter glanced at his watch for the tenth time. "Guess you will have to go, precious. I'll take you to the platform."

They single-filed through the aide and corridor, descended to the platform. "I'd take you into the station, but I don't dare. Can't afford to pay for another upper on the next train," his smile was strained.

"That's what I came to the train for, to see you off. I'll watch the train out of sight until the tall, lithe, blinks leeringly," her voice trembled a little in spite of herself.

"All aboard!" sang the porter. Peter's eyes plunged down into hers and held them for a breathless moment. Their arms clung to each other and their lips lingered in a long kiss.

"Have to go, sweetheart," he murmured.

They parted reluctantly as the train began to move. Peter sprang onto the step, followed by the porter, and stood waving his hand as the train gathered speed. Camilla waved back, dashing the tears from her eyes so that she could see his face more clearly. Bright, brown curls and sunny smile blurred together, became a tall figure moving swiftly into the distance. The clicking rails echoed, hummed, and with a last jarring wink, a red light on the observation platform blinked out.

Camilla turned and walked back through the station, got into a taxi-cab and directed the driver to her apartment. She felt numb, lifeless, empty. Part of her had gone away.

Peter stood at the steamer rail looking down into the sea of faces and the chaos of a pier at a ship's sailing. All the confusion of sounds

## FALSE TEETH

**Dr. WENNET'S POWDER**

Would you like false teeth to fit so firmly yet comfortably that they feel natural, and, above all, last all day long? You can forget all about them. Simply sprinkle on Dr. Wernet's Powder—prescribed by the world's foremost dentists—the one powder that assures 100% secure comfort. SENSITIVE FRAGILE GUMS—fort-cushion protects sensitive gums—always keeps mouth clean and sanitary—responsive—any drugless.

and sighs and odors swirled about him. He was detached, seeming to be no part of it, just watching with interest. He was thinking how different his landing in this great harbor must have been, almost a score of years before. He had arrived there, frightened, bewildered, clinging to his mother's hand.

And now, by the results of the skill which he had reproduced that occasion in clay, he was returning across the sea in honor; confident, serene, alone. For a moment, he wished that his mother might know what he had done. She always had talked to him of going "back home," yearned for it and begged him to go sometime, even if it hurt himself. It was possible that he could go to Stockholm from Paris before he returned to New York. But he could not plan definitely for that yet.

A bell clanged: Activity increased. People hurrying about and others hurrying ashore. Tears and laughter. Kisses, caresses. Sober faces, happy faces. Press photographers and reporters rushing to and fro. Women in smart clothes wearing bright corsages of flowers. To some of these this sailing was an occasion of their lives; to others, it was just another tiresome departure.

Bells, shouts, running feet. The gangplank raised. Frantic waving of hands and calling farewells. The pier drawing away from the huge steamer, disappearing into the distance. Boats puffing, tugs puffing about like distressed mother hens that had hatched eggs ducklings now turned into swans and didn't know what to do about them, freight-lifts slipping by, the skyline of the city looking like a picture of towers and spires against a dull gray sky, dissolving in the fog.

The Statue of Liberty slipped by like a phantom in the mist, an hallucination that never had been real. And so these hundreds were returning whence they—or their ancestors—had come.

Peter stared down into the lacy foam of the disturbed water, recalling the little white Camilla's face when it had receded into the distance at the station. He wished that he might have seen her again. But perhaps it was just as well that she had not come to New York with him. It would have meant for her a lonely journey back.

But, he resolved, there was nothing to be gained by yearning for Camilla, now. He had to right-about-face and make the best of what was ahead of him. As if the "new" world followed the thought, he turned about and walked down the deck toward his stateroom. Best to get settled for the week, and perhaps he could get some work done.

The days would be long and lonely even if he were friendly with his fellow passengers. He might have made the passage in five days on a faster steamer; but again, he had to consider the cost—tourist deck, inner stateroom on a fast boat.

As he turned into the corridor, he wondered suddenly if he were already seasick and perhaps even delirious. A strange sensation engulfed him and he put up his hand over his eyes with a vague gesture, as if he were seeing a vision.

There, facing him in the passage, was Avis Werth.

## THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver!

**Without Calomel**

You are "feeling poor" simply because your liver is sluggish. The daily two pills of this new laxative cleanses and stimulates your bowels, keeps your entire system in being. It is not a stimulant. It is a true laxative. Something that goes farther than calomel, mineral water, or any other laxative. It is a true laxative which only works the bowels—keeping the real cause of liver trouble out. Ask for Little Liver Pills. Purely vegetable. No harmful drugs. No calomel. Ask for them by name. Refuse substitutes.

## Search For Treasure

Young Englishman To Explore Lost City Of Sheba

In search of treasure hidden in the mysterious lost city of Sheba, once ruled by the glamorous queen, a young Londoner of 22 is setting out on a lone trek into the Arabian desert.

He is Norman Stone Pearn, who has recently returned from a 2,000-mile polar expedition across the Sahara.

Millions in gold, silver and precious stones, are believed to be hidden beneath the shifting sands which wipe the great city of Sheba from man's ken over 2,000 years ago.

"It is going to be a difficult trip with lots of risks," said Mr. Pearn. "The Arabian desert is one of the hottest places in the world, and one may die of thirst there in 24 hours. Pierce brigade lurk in its wastes, and lost trails mean almost certain death."

"Years ago Sheba was the centre of the trading routes across Arabia. In the reign of the great queen it was a city of luxury."

"At the death of the queen the city began to decline. It became overrun with thieves and brigands, and traders avoided it until Sheba became a forgotten city and the desert sands gradually obliterated it."

That was the end of the story.

THE RHYMING OPTIMIST

By Aline Michaels

OF JOY

Though sometimes long I woo it,  
This joy beloved of all,  
It may not heed my pleading  
Or answer to my call.

Then, like a swift wind veering,  
Its touch is on my life,  
More light than breeze-kissed petals  
Yet keener than a knife.

I never see it coming,  
I know not where it goes,  
Though, with me, it is fragrant  
And vivid as a rose.

It sends me no forerunner  
To say when it will start,  
And all I know of joy is  
Its singing in my heart.

## Made His Own Place

Prince Of Wales Has Endorsed Himself To People

It is one of the many practical advantages of King over President that there is no sharp break of personalities. The people learn to know and love the king while the father reigns, and love for the one confirms the other in a humane and natural succession. Our Prince, however, is not merely deputy to our King; he has made for himself his own interests and his own sphere of work.

The unemployed have learnt from him the Royal solicitude; the Social Service League, which he founded, seeks to fill their vacant hours and to give them, where work cannot be found, at least occupation. The clothing of shoes, the planting of gardens, the making of simple furniture, even the building of houses—such useful arts have given new hope and new interests, in many cases, to the lives of the unemployed.

The State may maintain the workless in life; but it requires the Royal touch to add something of cheerfulness and humanity—London Morning Post.

## Grilled Or Fried

He examined the menu carefully and then tossed it irritably on the table. "Waiter," he called, "is this all you have to-day?"

"Yes, sir," said the waiter, whose term of service expired at the end of the week.

"Why, there's nothing on the menu fit to eat—absolutely nothing," said the diner. "Bring me the manager!"

The waiter smiled. "Very good, sir," he said. "How would you like him—grilled or fried?"

Happiness is the art of never holding in your mind the memory of any unpleasant thing that has happened.

Even discounting its thick blanket of ice, the Antarctic land is the highest of the world's continents.

## HORSES WORK BETTER

when freed from Saddle Bells, Collars, Stirrups, Diaphragms, Collars, etc. by Minard's Liniment. Revives a horse of Minard's in the stable or on the road. In the house serve Vets and Horses well.

## Little Helps For This Week

"Beloved let us love one another, for love is of God, and everyone that loveth is born of God and knoweth God?" 1 John 4:7.

So to the calmly gathered thought, The innermost of life is taught, The mystery, dimly understood, That love of God is love of good; That to be saved is only this—Salvation from our selfishness.

—J. G. Whittier.

The Spirit of Love, wherever it is, is its own blessing and happiness, because it is the truth and reality of God in the soul, and therefore in the same good to itself everywhere and on every occasion. Would you know the blessing of all blessings? It is this God of Love dwelling in your soul and killing every root of bitterness which is the pain and torment of every earthly selfish love. For all wants are satisfied, all disorders of nature are removed, no life is any longer a task, every day is a day of peace, everything you meet becomes a help to you, because everything you see or do is all done in the sweet element of Love.—William Law.

## India To Pay Homage

Princes To Attend Silver Jubilee Of King George's Accession

Fifty elephant all gorgeously decorated, the famous "South of India Diamond"; 30 yard ropes of pearls—these are a few symbols of the glamour of the east which India will send to London next May, when some of her former native princes will come to celebrate the silver jubilee of the King's accession.

The 50 elephants, wearing jewels belonging to the 27 chief maharajas, are to take part in a brilliant procession in London's streets.

It is reported also that a court fair engaged by the Maharajah of Benares will come to London to pronounce his blessing on their Majesties.

The famous diamond, the "South of India Star," second only in importance to the Kohinoor, will be worn in his turban by the Kaikwar of Baroda during the ceremonies; and the Maharajah of Siam, of Siam, will wear his magnificent state robes with ropes of pearls amounting to 30 yards in length.

Emeralds and other jewels said to be worth \$500,000 will be worn by the Maharajah of Fattala.

A cabbage head is really a plant bud.

**DENICOTEA**

**CIGARETTE HOLDER**

DENICOTEA Cigarette Holder absorbs the nicotine, pyridine, tar, and other harmful substances found in tobacco smoke.

Complete holder with refill — \$1.00 postpaid, or from your Druggist or Tobacconist. Dealers wanted everywhere.

**NOW OBTAINABLE FROM**
